

Finnish Jazz Federation's carbon neutral touring / Roadmap 2030

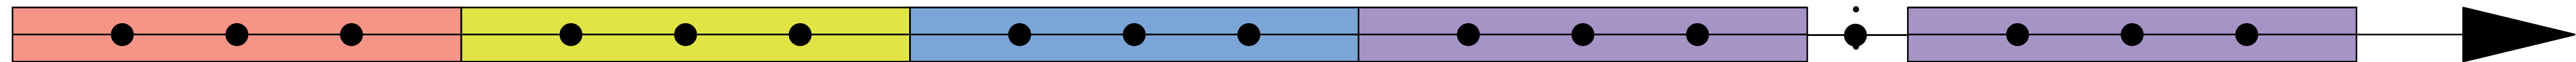

2026

Planning, trialling and communicating – Adapting

2027-2030

Influencing and international presence

Transport

- Uninterrupted and optimised tour travel
- Train + e-vehicle
- Residence accommodation with short day distances
- Combining day and evening concerts
- Moving away from individual car ownership
- Local backline and stage technology

Energy

- Accommodation in apartments or hotels with demonstrated low emissions
- Consider performance venues' energy sources and efficiency

Consumption

- Tasty vegetarian meals available at concert venues
- No single-use materials
- Consider emissions from purchased services

Cultural change

- Strategic work at board level
- Developing our member services, travel subsidy scheme, and co-productions
- Follow-up
- Communicating change and engaging members
- Climate action

Cultural change

- Keep adapting our strategy to meet changing requirements
- Methodical influencing and evaluation
- Increasing our international influence

Goals 2026

- Responsibility and environmental work are part of our overall strategy.
- We implement best practices identified and tested during pilot tours.
- New procedures are developed and further refined with our members.
 - We improve our responsibility communications.
 - We refine our mid-range plan.
 - We measure our emissions and continue to report on them.
- We take action to neutralise unavoidable emissions domestically.

Goals 2030

- We have routines in place for producing carbon-savvy tours.
- We adapt to changing regulations.
- We increase our influence.
- Our international activities are carbon-savvy.
